Ruben Lupancu

Satu Mare, Suceava 727480 | +40 753 851 305 | lupancuruben2@gmail.com

Professional summary

2026 Computer Science Graduate specializing in Software Engineering and incoming Cybersecurity Master's student starting October 2026. Proven problem-solving track record through competitive tournaments. Experienced in fast-paced environments with a clean U.S. travel history (3x J-1 visas honored, NOT subject to 212e). Seeking Remote Junior Software Engineer, AppSec, or Full-Stack developer contract roles (B2B/Independent Contractor) aligned with US-timezones..

Work experience

Freelance Full Stack Web Developer

self employeed | Suceava, Romania

January 2025 to Present

- Developed and deployed responsive web applications for local small businesses, improving their online visibility and user engagement.
- Designed and thoroughly tested API endpoints using Postman to ensure seamless frontend-backend integration, data security, and optimal performance.
- Utilized GitHub for version control, maintaining clean repositories, proper branch management, and solid documentation for all client projects.

Recreation Attendant (J-1 Seasonal - 3x Rehired)

Otesaga Resort Hotel | Cooperstown, NY

June 2024 to October 2025

- Successfully rehired for 3 consecutive summer seasons (2024, 2025, 2026) under the J-1 Work & Travel program, demonstrating strong adaptability, work ethic, and corporate reliability.
- Delivered exceptional customer service in a premium, fast-paced luxury resort environment, communicating daily with native English speakers and international teams.
- Managed resort facilities and guest schedules while strictly enforcing safety protocols, proving high responsibility and problem-solving skills under pressure.

Full Stack Developer / Team Lead

Assist Tech Challenge | Suceava, Romania

March 2024 to April 2024

- Led a cross-functional Agile team of 4 (Frontend, Backend, QA, Designer) to architect and develop "Team Finder", a production-simulated web platform optimizing internal project staffing.
- Awarded 1st Place for Top Individual Technical Contribution out of all tournament participants for outstanding execution across both Frontend (React) and Backend (Node.js/Express/MongoDB Cloud).
- Managed end-to-end repository integration via GitHub, resolving code conflicts, and validated all API architecture using Postman under the mentorship of senior industry engineers

Backend Developer

ASSIST Tech Challenge | Suceava, Romania

March 2023 to April 2023

- Developed the core backend architecture for "Intelligent Forms App", a software solution automating public form completion via ID scanning and data parsing.
- Built scalable REST APIs using Node.js and Express, implementing secure data persistence with PostgreSQL database management
- Collaborated closely in a simulated software agency structure, utilizing Git for version control and Postman for rigorous API testing and endpoint validation.

Education

Cybersecurity (Master's degree)

Stefan Cel Mare University Of Suceava | Suceava

October 2026 to Present

Advanced study program focusing on Network Security, Cryptography, Defensive Strategies, and Data Protection. Developing modern cybersecurity methodologies while maintaining active engagement with global tech trends and international remote software engineering frameworks.

Computer Science (Bachelor's degree)

Ștefan Cel Mare University Of Suceava | Suceava

October 2022 to July 2026

Focused on Full-Stack Software Engineering. Actively selected to compete in industry-sponsored tech challenges (ASSIST Tech Challenge 2023 & 2024), collaborating in simulated Agile development environments with dedicated industry mentors. Developed a strong technical portfolio in React, Node.js, and cloud database management.

Skills

React | **Agile product development** | **SQL** | **RESTful API** | **Git** | **Teamwork** | **English** | **JavaScript** | **Restaurant experience** | **Full-stack development** | **GitHub** | **Node.js** | **MongoDB** | **Hotel experience** | **C++** | **Postman (API platform)** | **Express.js**

Certifications and licenses

The Complete Full-Stack Web Development Bootcamp

October 2024 to Present

Completed an intensive 62-hour full-stack engineering curriculum. Developed over 30 web projects, mastering frontend logic (React, JavaScript ES6, DOM, Bootstrap 5) and backend infrastructure (Node.js, Express.js, REST APIs, PostgreSQL databases, and Git/GitHub version control).
